R929 BELTS

NEW SG GENERATION

Using the latest grain technology for your belts

ABRASIVE TECHNOLOGICAL EXCELLENCE

R929 BELTS NEW SG GENERATION

SG new generation - sharper edges generate an aggressive and low energy cut

Features:

- Backing : Strong Polyester cloth
- Abrasive : SG new generation and Aluminium oxide
- Bond : Phenolic with high content of active fillers
- Grit availability : 36,40,50,60,80,120

Benefits:

- High metal removal rate
- Long life due to special abrasive micro chipping properties
- Excellent cut rate at low & medium pressure
- The razor sharp abrasive edges & active grinding aid combine to provide a cool cut
- Generate an excellent surface finish

Applications

- Multi-purpose high end belts for backstand applications on metal including heat sensitive alloys
- Excellent in hand held grinding operation (file belts, ...) on Inconel or Stainless steel
